▲ **The Platform**

Executive Projects

Nazemi House is one sample of renovation projects which the whole phases thought on its interior design and landscaping has been done during six months

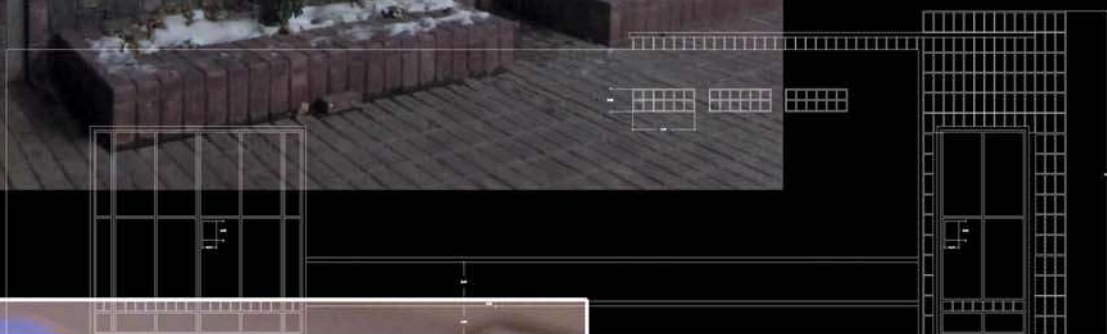

▲ To the Lounge

▼ From the Yard to entrance

▲ The Lounge

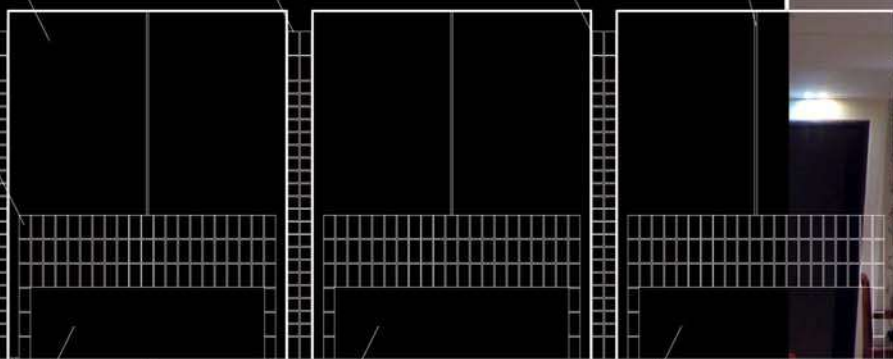

Executive Projects

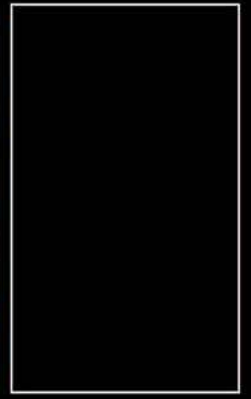

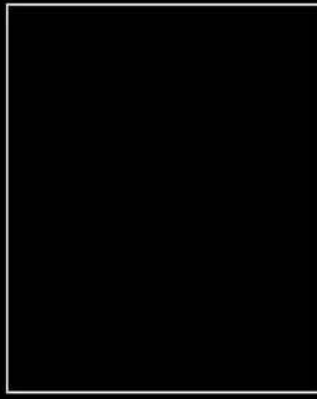

▲ Entrance Facade

▼ To the Suspended ceiling

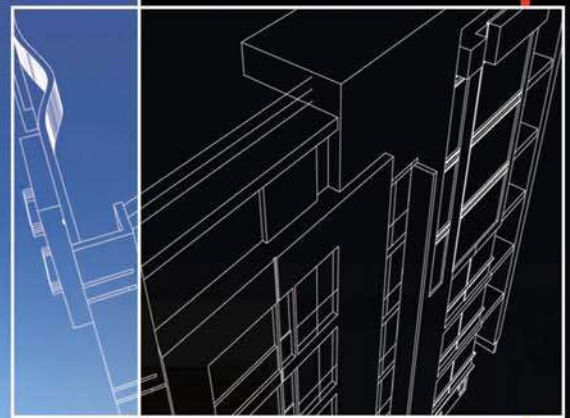

- These interior designs are totally accomplished works which I have designed, supervised and implemented in residential buildings.

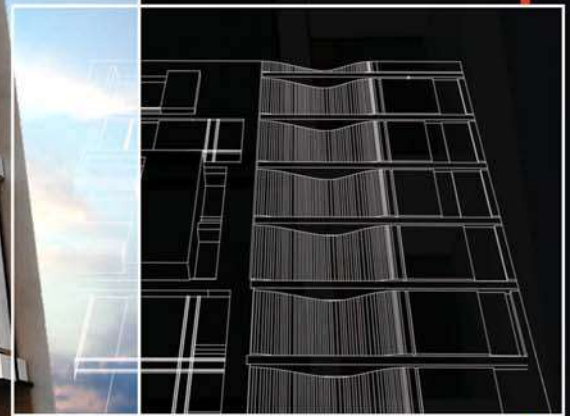

Executive Projects

West Facade

▲ Bird-view to the south Facade

▲ Observer view to the west side

■ **Kamranieh residential complex located at the street-corner of Bahonar Ave., Tehran has been designed and rendered by 3ds Max software. It's one of the latest projects which now is in the contract phase. Environmental conditions took us the opportunity to use thermo-wood and white stone to clad the facades**

▼ Observer view to the south side

▲ South Facade

Observer view to the south side

▲ Observer view to the corner

▲ South Facade

▼ Outer shell which acts as a 3D facade

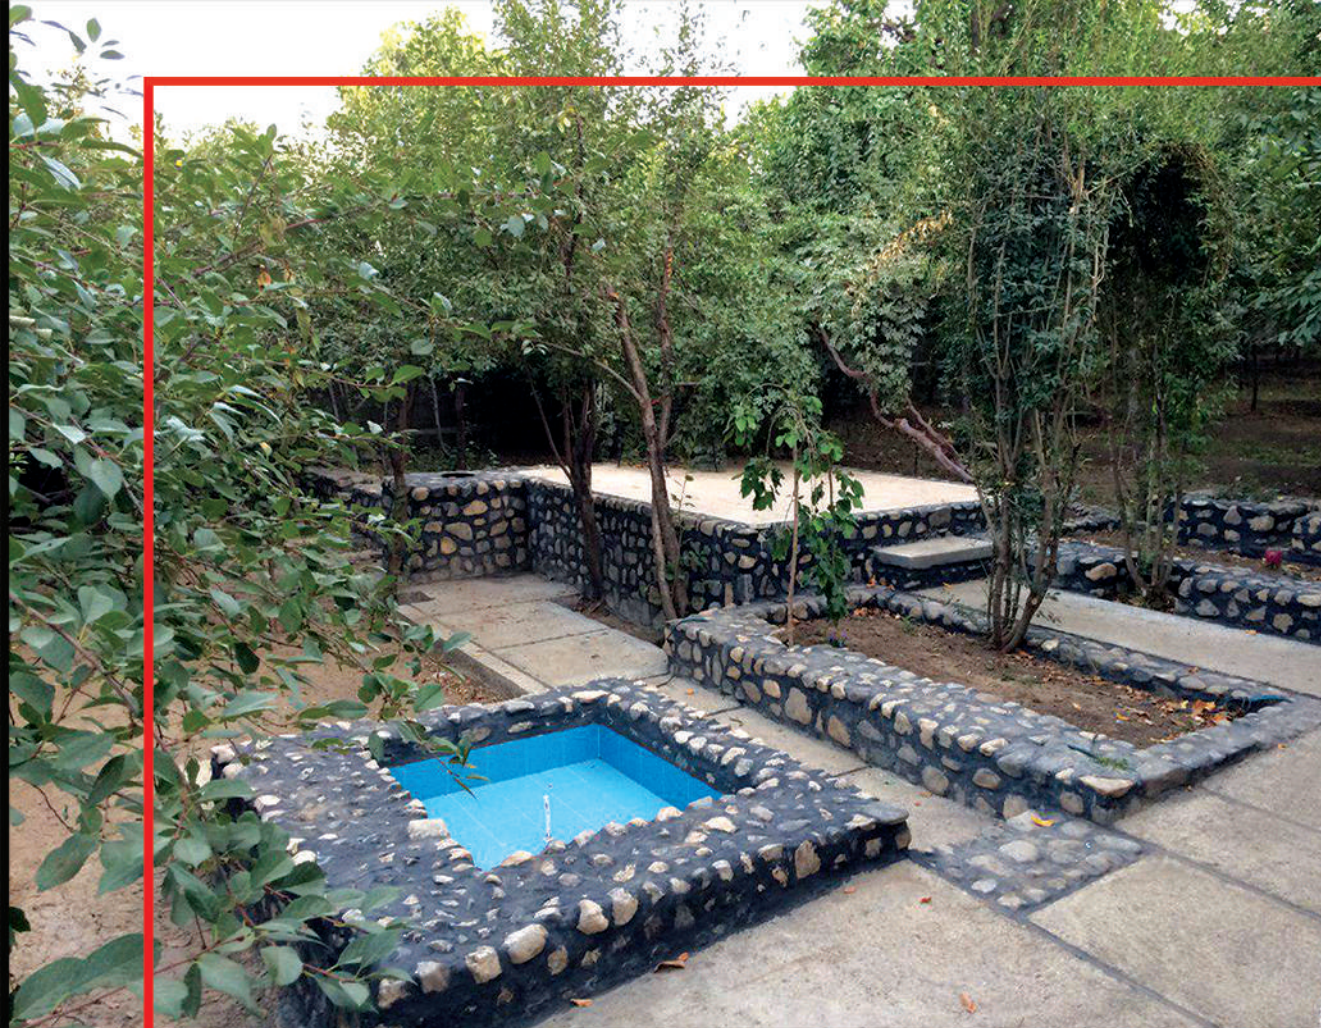

Facade's Overhangs

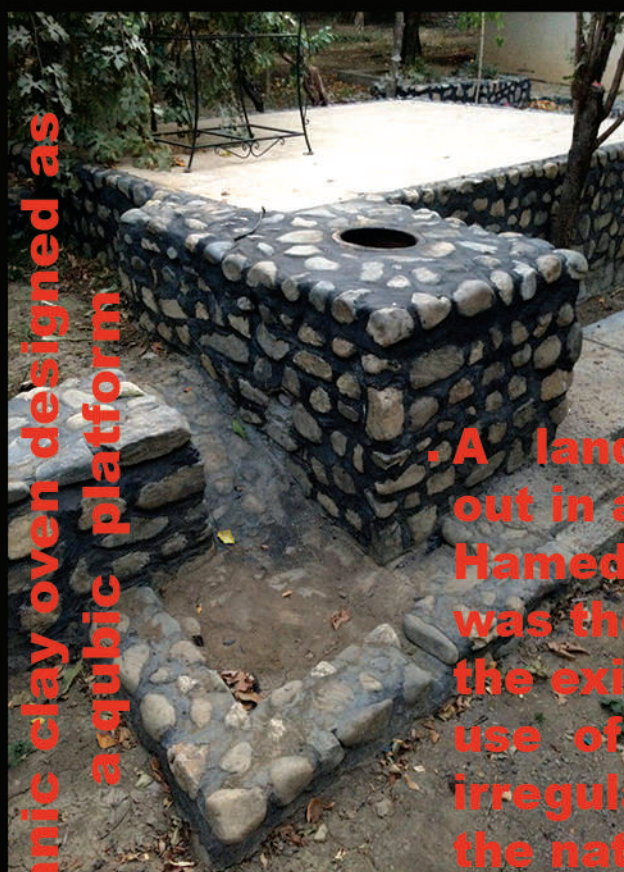

. Canopies and flower-boxes make building's envelope a 3D facade. Moreover, they protect indoor spaces from direct sun radiation and from overheating casting shadow on windows during the summer.

Executive Projects

▲ A blue stone pond beside the flower-beds

Organic clay oven designed as a cubic platform

• A landscape project carried out in a scenery countryside of Hamedan, Iran. Organic design was the main concept to form the existing vegetation. The use of native stones with a irregular arrangement, keeps the natural scence of the site .

▲ Wading pool inside the garden

Under the construction

. A wading pool which can be used as a water resevior , is one of the main requests of the project. The integration of modern and rural design made a harmony with the surrounding nature .
