
The Rock Apartment

The Rock Apartment

Air, noise, and visual pollution, combined with a lack of nature in Tehran’s urban areas, neighborhoods, and homes, inspired the concept for the "Rock Apartment."

Creating a rock-like façade using vertical panels not only introduces nature into the home and neighborhood but also gives the building a distinctive, iconic character. Furthermore, the use of natural elements such as plants in interior spaces, on balconies, and on the rooftop amplifies the presence of nature within the home, fostering greater interaction between families and the natural environment.
